Mascot Mk2 Care Cot

Fully modular, adjustable and future proof

NEW!

The Mascot Mk2 from Theraposture is a care cot for life. Building on the popular features of the original Mascot, this future proof solution eliminates the need to buy a new cot as user needs change. This hand crafted, bespoke sleeping solution encompasses fully adjustable door heights ranging from 60–120cm that include an innovative securing mechanism for enhanced safety.

Delivering safety, comfort and affordability the Mascot Mk2 care cot from Theraposture is the flexible solution for changing user needs.

Competitively priced without compromising quality

B086 Mascot Mk2 Care Cot Brochure - Issue 3 -1st May 2026

Mascot Mk2 cot – a bed for life

Why buy a Mascot Mk2?

As the market leading expert and supplier of adjustable Care Cots, Theraposture Ltd have concluded that there is a need for a cot bed that offers enough flexibility to change when needs change.

Frequently care cots can be over specified to cater for possible future needs that are not always known. This adds to the cost and in many cases this extra specification is never needed.

The solution is a modular design that is interchangeable and adaptable so that the cot bed can be easily modified in a cost effective way.

Two easily interchangeable access options

8 door opening

4 door opening

- Meets 80% of all clients needs
- Hand-crafted in high quality Beech wood with robust mechanisms and reliable motors
- Offers leading flexibility because of its modular design
- Easy conversion from four to eight doors for access to one or both sides
- Door height choice of 60, 80, 90, 98cm and now the new 120cm high door option
- Choice of functions including profiling, variable height and Anti-Trendelenburg

- Choice of platform sizes: 140cm x 90cm; 170cm x 90cm and 200cm x 90cm
- Low entry height of just 21.5cm
- Choice of interchangeable rails, Perspex or padding in any cot section
- Helps to reduce potential back strain for carers
- Competitively priced and saves money in the long term
- Available from stock with massively reduced lead times
- Special low package prices available including padding and mattress

The Mascot's internal divider system allows for the cot to be shortened in length whilst a child is small. It can be removed as the user grows meaning that an appropriate sized sleeping area is always achieved. This also creates a useful storage area.

Simple, secure, safe and easy to use

Two choices in function

Option 1. Variable height only with Anti-Trendelenburg / Trendelenburg

KR1

Trendelenburg function can be locked with a safety key

Option 2. Variable height and profiling with Anti-Trendelenburg / Trendelenburg

KR3

Trendelenburg function can be locked with a safety key

On all Mascots the variable height range is 60cm which means that the BSEN60601-2-52 (BS EN IEC 80601-2-52:2026) regarding safe working height is met.

The starting height of the sleeping platform is just 21.5cm making this one of the lowest cot beds available. This rises to 81.5cm when the entire cot bed is lifted to ensure that the full cot side height is maintained even in the highest position.

Soft windows

These clear windows make a massive difference to a cot that requires padding as without them, the cot may appear enclosed. As they are soft, they become part of the padding and therefore safety is not compromised. Our windows are double 'glazed' with a pocket of air and are perfectly transparent.

A safe, cosy & secure environment

Our padding and mattresses always fit together snugly so there are no gaps which could pose an entrapment risk. We commonly use soft-touch Panvelle or vinyl for Theraposture padding which is non-permeable, anti-bacterial, anti-microbial and anti-fungal.

It can either be attached with Velcro or bolts for extra security and fabrics are available in a vast range of fun designs along with bite resistant / anti-tear materials.

Optional top edge padding

Every Mascot Mk2 can be padded however you wish. If you choose for door padding to be full height then we can pad over the top edge as well so safety is enhanced. One of our Trusted Assessors will be able to consider whether this is required during the assessment process.

Ask us about cost savings with our Mascot packages (cot, padding and mattress) – call: 0800 834654

Mascot Mk2 Care Cot

Fully modular, adjustable and future proof

Two finish options

Beech hardwood painted white (special order)

Beech hardwood with coloured rails and clear Perspex

Specification options

Under bed light	option
Locking bar	option
Packages	option
Mattress	option
Electrical back up	emergency single use lowering
	full back up option
Voltage	230v
Output	24v

Door height options (interchangeable)

The default arrangement is for Perspex on doors one and four with rails in doors two and three.

- **60cm** (One piece full height rails and Perspex)
- **80cm** (One piece full height rails and Perspex)
- **90cm** (Full height rails and Perspex with strengthening batten)
- **98cm** (Full height rails and Perspex with strengthening batten)
- **120cm** (Full height rails and Perspex with strengthening batten)

Because the door inserts are removable, you can specify any combination of rails or Perspex on all Mascot beds, either at the time of provision or retrospectively. Feed tube or ventilation tube holes or slots can be provided if needed. The removable door inserts also allow for padding, rails or Perspex at any time.

Mattresses

All mattresses that are used in the Mascot Mk2 are supplied with wipeable covers. Each mattress is cut to the exact internal dimensions of the cot bed to ensure that there are no gaps.

The choice is:

- Standard foam
- W17 medium risk
- W14 low risk
- W24 high risk

Our trusted service and 14-day Suitability Guarantee

By choosing Theraposture you will be offered a free of charge home assessment including a product demonstration.* This is a vital part of our process in determining the best solution for the intended user.

Our Trusted Assessors working with a Healthcare Professional will help to identify and understand the needs, wants and risks for each user.

By working with our Assessor, we will take the full responsibility for what is made and supplied.

We will provide a suitability guarantee in every situation, including bespoke products, to ensure that should any issues arise within the first 14 days of use, Theraposture will either make changes, remake the product to a different specification (to an equivalent value) or will refund the cost of the product (conditions apply).

Our goal is to achieve positive outcomes for all of our equipment users.
